

COST Action FP1005 Final Conference

Production of ultra-strong cellulose fibres (*Credit: DESY/Eberhard Reimann*)

Fibre Suspension Flow Modelling

A key for innovation and competitiveness in the pulp & paper industry

<http://www.fp1005.cism.it/pages/FP1005-final-conference.html>

Conference main topics: Experimental methods for measuring fibre suspensions, rheological characterization of fibre suspensions, two-phase flow modeling of fibre suspensions

Invited speakers: Tomas Wikstrom (Valmet AB, SE), Fredrik Lundell (KTH Stockholm, SE), Greg Voth (Wesleyan University, USA), Pierluca Maffettone (University of Naples, IT), Bernhard Mehlig (University of Gothenburg, SE)

June 9-11, 2015

Conference Venue:
Dept. Energy and Process Engineering
Norwegian University of Science
& Technology, Trondheim (Norway)
