Action's Final Conference

From Vademecum:

The COST Action may be extended beyond its originally intended end date if, during the course of the Action, the MC determines that it is, for technical reasons, impossible to bring the work under the Action to a satisfactory conclusion within the originally envisaged period of duration. Extensions of COST Actions are exceptional and must be duly justified from an S&T or network activities point of view. Should the COST Action that requests an extension need a budget increase, both requests must be introduced at the same time. The final assessment of Actions having benefited from an extension shall include a dedicated section assessing the extension period (see COST 4114/13).

Action's Final Conference

From Vademecum:

The Action MC can decide to organise a final workshop or conference serving to highlight and showcase the achievements of the Action. It should be the last activity of the Action and must occur before the end of the last grant period. It serves to disseminate the Action achievements. In duly justified exceptional cases, and following a formal request for approval from the COST Office, the final workshop or conference may take place after the official Action's end date. The request for approval of this final event must be scientifically justified and submitted at least 6 months before the end of the final grant period. When under consideration, the request for an extension of the Action's duration will need to be formally approved by the COST Office, the DC and the JAF.
